

Review Form 3

Journal Name:	Journal of Advances in Biology & Biotechnology
Manuscript Number:	Ms_JABB_124708
Title of the Manuscript:	Performance of Tomato hybrids Arka Samrat and Arka Abedh in Alluri Sitarama Raju District of Andhra Pradesh, India
Type of the Article	

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	This paper is a great contribution to agriculture, demonstrating the outcomes of the economic analysis of tomato hybrids Arka Abhed and Arka Samrat over the farmers. The research conducted and the findings presented have the potential to advance our understanding of improved practices and convince farmers to adopt improved farming practices to enhance their economic livelihood. The robust methodological approach, thorough data analysis, and thoughtful interpretation of results make this a high-quality and impactful piece of work.	
Is the title of the article suitable? (If not please suggest an alternative title)	The main title should be revised to reflect the content of the article, so I suggest the following modification: Performance evaluation of tomato hybrids Arka Samrat and Arka Abedh in Alluri Sitarama Raju District, Andhra Pradesh, India	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract should be paraphrased and focus briefly on the article's results.	
Are subsections and structure of the manuscript appropriate?	The manuscript is well organized with appropriate subsections and structure.	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	The manuscript presents a well-designed experimental study that closely aligns with established best practices in the field. The theoretical framework is solidly grounded in the relevant literature, and the research questions logically follow from the existing knowledge. The data analysis techniques are appropriate and rigorously applied, and the conclusions drawn are well-supported by the statistical evidence provided.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Yes, the references are modern and sufficient.	
Minor REVISION comments Is the language/English quality of the article suitable for scholarly communications?	The language requires a simple review in terms of linguistic and spelling errors, as well as the structure of sentences.	
Optional/General comments	<ol style="list-style-type: none"> 1. The introduction is good in terms of presenting the scientific background necessary for the reader to understand the topic. However, the writing of the introduction can be improved. 2. The materials and methods section needs to be reorganized so that it can be divided into separate subsections that include materials used for testing, programs used, work procedures, etc. 3. The discussion needs to be deeper, with more precise and lengthy scientific interpretations of the results obtained, because in its present form, it superficially discusses the results and does not provide a complete scientific explanation. Therefore, considering the discussion is one of the most important parts of the article, it must be given the highest priority and importance. 	

Review Form 3

PART 2:

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
