Journal Name:	<a href="#">Journal of Advances in Biology &amp; Biotechnology</a>
Manuscript Number:	<b>Ms_JABB_124949</b>
Title of the Manuscript:	<b>Comparative analysis of some Morpho-cultural characters of <i>Venturia inaequalis</i> (Apple Scab Pathogen) under Kashmir conditions</b>
Type of the Article	

**Review Form 3**

**PART 1: Review Comments**

<b>Compulsory</b> REVISION comments	<b>Reviewer's comment</b>	<b>Author's Feedback</b> (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.</b>	This study highlights the significance of understanding the morpho-cultural characteristics of <i>Venturia inaequalis</i> , the pathogen responsible for apple scab, a major threat to apple cultivation. By comparing isolates from different regions, it provides insights into how genetic diversity, fungicide pressure, and environmental factors contribute to variations in pathogen behaviour, which is crucial for developing targeted disease management strategies and ensuring sustainable apple production.	
<b>Is the title of the article suitable? (If not please suggest an alternative title)</b>	"Regional Variability in Morpho-Cultural Characteristics of * <i>Venturia inaequalis</i> *: Implications for Apple Scab Management in the Kashmir Valley"	
<b>Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.</b>	Comprehensive	
<b>Are subsections and structure of the manuscript appropriate?</b>	Appropriate	
<b>Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.</b>	This abstract is important because it emphasizes the need for understanding regional pathogen variations, which is essential for developing effective, location-specific strategies to combat apple scab and ensure sustainable apple production.	
<b>Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.</b>	Yes, sufficient	
<b>Minor</b> REVISION comments		
<b>Is the language/English quality of the article suitable for scholarly communications?</b>	It is suitable	
<b>Optional/General</b> comments		

**PART 2:**

	<b>Reviewer's comment</b>	<b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Are there ethical issues in this manuscript?</b>	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
