

Review Form 3

Journal Name:	Journal of Experimental Agriculture International
Manuscript Number:	Ms_JEAI_125444
Title of the Manuscript:	A review on Role of Beneficial Insects in Sustainable Crop Production Systems
Type of the Article	Review Article

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	This manuscript is valuable to the scientific community as it consolidates current knowledge on the role of beneficial insects in sustainable crop production, providing a comprehensive review of their ecosystem services, including pest control, pollination, and soil health enhancement. By addressing the challenges and strategies for effectively integrating beneficial insects, it offers critical insights for researchers and practitioners seeking to reduce chemical inputs and support biodiversity in agricultural systems. Additionally, the manuscript highlights future directions, such as the potential of Integrated Pest and Pollinator Management (IPPM) and digital technologies, thereby serving as a foundation for advancing sustainable practices in agriculture and fostering cross-disciplinary collaboration.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Yes	
Are subsections and structure of the manuscript appropriate?	Yes	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	This manuscript is scientifically robust and technically sound due to its comprehensive review of up-to-date literature and reliance on a range of peer-reviewed studies that validate the roles of beneficial insects in sustainable agriculture. It systematically addresses the ecosystem services provided by beneficial insects, presenting evidence-backed discussions on pest control, pollination, and soil health enhancement. By incorporating recent advancements in conservation biological control, habitat management, and precision agriculture, the manuscript demonstrates a well-rounded understanding of both traditional and innovative approaches in this field. Additionally, its analysis of current challenges and solutions showcases a balanced and well-supported perspective, ensuring both scientific accuracy and practical relevance.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Yes, please cross check the all references again	
<u>Minor</u> REVISION comments Is the language/English quality of the article suitable for scholarly communications?	Yes, language is suitable and easy to understand for scholarly communications.	
<u>Optional/General</u> comments	Please add quality photograph of insect pests.	

Review Form 3

PART 2:

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
