

Review Form 3

| | |
|--------------------------|--|
| Journal Name: | Journal of Scientific Research and Reports |
| Manuscript Number: | Ms_JSRR_125172 |
| Title of the Manuscript: | A Study on Sustainable Neem Seed Collection and Utilization Practices in Selected Cluster of Tamil Nadu |
| Type of the Article | Original Research Article |

Review Form 3

PART 1: Review Comments

| <u>Compulsory</u> REVISION comments | Reviewer's comment | Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i> |
|--|---|--|
| Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part. | This manuscript deserves publication for no other reason than its sophistication, thoroughness, and transparency! I am primarily a qualitative researcher and rather dreaded reviewing this manuscript as I thought I would not understand or be interested in all the quantitative data. Actually, I became mesmerized while reading the abstract and continued in that vein until the very end of the manuscript. | |
| Is the title of the article suitable? (If not please suggest an alternative title) | The title of this paper is suitable | |
| Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here. | In the abstract, add one or two sentences about the challenges of the study and later discuss the contributions made. | |
| Are subsections and structure of the manuscript appropriate? | Yes | |
| Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part. | Neem seeds possess significant economic value due to their various commercial uses. The quality of these seeds is essential in influencing their market price. The active constituents found in neem have been identified as having a chemo preventive effect on various tumor types by modulating several cellular signaling pathways. The leaves of the Neem tree appear to generate a distinctive group of glycoproteins known as neem leaf glycoprotein (NLGP). When tested in mammalian subjects, this glycoprotein demonstrated immune-modulatory properties, potentially aiding in the inhibition of tumor progression by influencing both local and systemic immune responses | |
| Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form. | References are good no need to add more references because this is a Research Paper | |
| <u>Minor</u> REVISION comments Is the language/English quality of the article suitable for scholarly communications? | Concentrate on improvement in terms of grammar, spelling, and presentations. The paper needs careful English polishing since there are many typos and poorly written sentences | |
| <u>Optional/General</u> comments | Add the future scope of the study, Conflict of interest, and acknowledgment. | |

Review Form 3

PART 2:

| | Reviewer's comment | Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i> |
|---|--|---|
| Are there ethical issues in this manuscript? | <i>(If yes, Kindly please write down the ethical issues here in details)</i> | |
