

**Review Form 3**

Journal Name:	<a href="#">Asian Journal of Education and Social Studies</a>
Manuscript Number:	Ms_AJESS_126287
Title of the Manuscript:	Teacher Educators' Mental Stress towards Online Teaching
Type of the Article	Original Research Article

**Review Form 3**

**PART 1: Review Comments**

<b>Compulsory</b> REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	Personally, I find this manuscript good as the findings presented have the potential to inform future research and contribute to policy discussions. I appreciate the manuscript's attempt to address this gap in the literature; however, I believe it lacks depth in certain areas, which could limit its overall impact.	
Is the title of the article suitable? (If not please suggest an alternative title)	The title of the article is generally suitable as it reflects the core focus of the research.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract provides a solid overview of the manuscript; however, it could benefit from greater specificity regarding the methodologies used and key findings. I recommend adding a brief mention of the sample size and the main results to enhance its comprehensiveness. Additionally, clarifying the significance of the findings in relation to existing literature would strengthen the abstract.	
Are subsections and structure of the manuscript appropriate?	The subsections and overall structure of the manuscript are appropriate for the content presented	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	While the manuscript attempts to address significant issues, it does not provide a robust methodological framework or comprehensive data analysis. Certain assumptions made in the study lack adequate justification, and the interpretation of results could be more thoroughly supported by the data. There are also potential oversights in addressing alternative explanations for the findings, which raises questions about the overall reliability of the conclusions drawn.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form. -	The references cited in the manuscript appear to be sufficient in quantity, but some key studies from the past few years are missing, which could enhance the depth of the literature review.	
<u>Minor</u> REVISION comments  Is the language/English quality of the article suitable for scholarly communications?	The language quality of the article is generally suitable for scholarly communication. However, some sentences could be more concise to improve clarity. For instance, the sentence "The study aimed to find out the mental stress of teacher educators towards online teaching in respect to their gender and type of institutions" could be simplified to "This study examines the mental stress of teacher educators related to online teaching, focusing on gender differences and institutional types."	
<u>Optional/General</u> comments
