

Editor's Comment:

Regarding the assigned paper, I have the following comments:

- In the first section (Introduction) the authors need to introduce a paragraph regarding the structure of the paper. Moreover, I do not recommend to formulate the Hypothesis as 1.1. in this section. Usually, if there is a 1.1, the reader expects to see also the 1.2.
- Therefore, I consider more properly to entitle the second section Literature review and research hypothesis / Theoretical framework and research hypothesis. In this context the hypothesis can be correlated with the theory.
- I do not like the formulation of the conclusion, policy recommendations and limitations as a bullet list - it gives the impression of a sketchy presentation. For a research paper I recommend to present the ideas in phrases.

After the authors will revise the paper according to these suggestions, the paper can be published.
