Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form. -		
<u>Minor</u> REVISION comments Is the language/English quality of the article suitable for scholarly communications?		
Optional/General comments	I had gone through the article thoroughly. My research area also connects with this article entitled, " Proline accumulation and drought tolerance in green gram (<i>Vigna radiata</i> L.) ". Therefore, I have not found any corrections in the article. I, tried to concise the article but everything found important and complete with proofs. Only Photographs and few graphs are needed, are my suggestions, if you allot the space in the book/Journal. Otherwise the article is feasible in our esteemed International Journal of Plant and Soil Science. Therefore, I declare this article valid to get published and request to get approved.
