Journal Name:	<a href="#">Journal of Advances in Biology &amp; Biotechnology</a>
Manuscript Number:	Ms_JABB_125182
Title of the Manuscript:	Effect of incorporating Hibiscus sabdariffa seed flour (red variety) on zootechnical performance of broilers cobb500 strain
Type of the Article	Original Research Article

**Review Form 3**

**PART 1: Review Comments**

<b>Compulsory</b> REVISION comments	<b>Reviewer's comment</b>	<b>Author's Feedback</b> (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p><b>Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.</b></p>	<p>This manuscript provides valuable insights into the use of <i>Hibiscus sabdariffa</i> seed flour as a feed additive for broiler chickens, addressing an important issue in poultry production—reducing feed costs while maintaining or enhancing performance. The study's findings are particularly relevant for regions with limited access to conventional feed ingredients, as it suggests a locally available and cost-effective alternative. The research is well-executed with significant implications for improving poultry productivity, particularly in developing countries.</p>	
<p><b>Is the title of the article suitable? (If not please suggest an alternative title)</b></p>	<p><b>The title "Effect of incorporating Hibiscus sabdariffa seed flour (red variety) on zootechnical performance of broilers Cobb500 strain" is informative</b></p>	
<p><b>Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.</b></p>	<p><b>The abstract provides a good overview of the study, summarizing the aim, methodology, key findings, and conclusions.</b></p>	
<p><b>Are subsections and structure of the manuscript appropriate?</b></p>	<p><b>The subsections and structure of the manuscript are generally appropriate, adhering to standard scientific paper formatting</b></p>	
<p><b>Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.</b></p>	<p><b>This manuscript is scientifically robust and technically sound due to its well-defined experimental design, which includes clear control and treatment groups, appropriate sample sizes, and the use of statistical analyses to support the results. The methodology is thoroughly explained, particularly the formulation of rations, data collection, and analysis of zootechnical parameters, allowing for replication of the study. Furthermore, the study addresses a relevant and timely issue—finding cost-effective, locally available feed alternatives—backed by a detailed literature review. The statistical methods used (ANOVA, Tukey post hoc tests) ensure that the conclusions drawn are based on significant findings, making the manuscript scientifically credible.</b></p>	
<p><b>Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.</b></p>	<p><b>The references in the manuscript appear sufficient and cover relevant studies that align with the research topic.</b></p>	
<p><b>Minor</b> REVISION comments</p> <p><b>Is the language/English quality of the article suitable for scholarly communications?</b></p>	<p>The language of the article is generally understandable</p>	
<p><b>Optional/General</b> comments</p>		

**Review Form 3**

**PART 2:**

	<b>Reviewer's comment</b>	<b>Author's comment</b> <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<b>Are there ethical issues in this manuscript?</b>	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
