### Review Form 3

#### PART 1: Review Comments

<b>Compulsory</b> REVISION comments	<b>Reviewer's comment</b>	<b>Author's Feedback</b> (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.</b>	Overall, this manuscript is ok for its practical implications and its contribution to advancing knowledge in veterinary therapeutics. However, clarity and precision in the methodology and results sections could enhance its impact ensuring that findings are easily reproducible	
<b>Is the title of the article suitable? (If not please suggest an alternative title)</b>	Title of the manuscript is suitable	
<b>Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.</b>	Abstract does not clearly explain the differences between treatment groups (G1, G2, G3 and G4) and why these specific groups were chosen. It should be properly structured with little background, objective, method, result and conclusion.	
<b>Are subsections and structure of the manuscript appropriate?</b>	The manuscript seems to maintain a logical flow from introduction of the problem to presentation of results and their interpretation.	
<b>Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.</b>	The detailed reporting of results including somatic cell counts and various milk parameters supports the reliability of the findings making a significant contribution to the understanding of alternative treatments for mastitis in goats.	
<b>Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.</b>	Author has reviewed well but the manuscript lack systematic review, recent studies and gaps in knowledge	
Minor REVISION comments		
<b>Is the language/English quality of the article suitable for scholarly communications?</b>	The manuscript would benefit from improved clarity and precision in its English language usage. Several sentences contain grammatical errors and awkward phrasing which can hinder comprehension.	
<b>Optional/General</b> comments
