

Review Form 3

Journal Name:	Asian Journal of Pediatric Research
Manuscript Number:	Ms_AJPR_125860
Title of the Manuscript:	CASE REPORT ON ANTI-N-METHYL-D-ASPARTATE ENCEPHALITIS
Type of the Article	Case report

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<p>Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.</p>	<p>Although this case report doesn't have any "unusual" or "atypical" presentation or a significant novelty in the diagnosis and management, it is a good example of how to suspect the diagnosis of autoimmune encephalitis in a patient, and the respective initial management, as this entity presents with non-specific symptoms and it is crucial to have a high level of clinical suspicion.</p>	
<p>Is the title of the article suitable? (If not please suggest an alternative title)</p>	<p>The title is adequate.</p>	
<p>Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.</p>	<p>There are some grammatical aspects that could be improved in the following sentences: -"The case study aims to describe and evaluate the initial neuropsychiatric symptoms, therapeutic methods, and diagnostic criteria of a 3-year-old girl who had been diagnosed with [...]". -"A 3-year-old developmentally normal girl child was brought to the hospital with C/O fever for 2 days. Following this, she had seizures lasting for around 2 minutes, followed by shivering movements in the right leg for 15 minutes, and then she regained consciousness after 25 minutes."</p>	
<p>Are subsections and structure of the manuscript appropriate?</p>	<p>They are adequate.</p>	
<p>Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.</p>	<p>This case report is very simple and straightforward. It is a good and sound example of a relatively typical case of autoimmune encephalitis with anti-NMDAr autoantibodies, which is one of the most common types in this pathology, showing appropriate clinical suspicion, diagnosis, management, and follow-up.</p>	
<p>Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.</p>	<p>Yes, they are adequate.</p>	
<p>Minor REVISION comments</p> <p>Is the language/English quality of the article suitable for scholarly communications?</p>	<p>Yes, the authors may perform the grammatical suggestions mentioned above.</p>	
<p>Optional/General comments</p>	<ol style="list-style-type: none"> 1. Please provide image of MRI showing the findings described in the manuscript. 2. Provide normal value references for all laboratory values given in the manuscript. 3. Were any possible associated malignancies ruled out? If so, how were they ruled out?
