

**Review Form 3**

Journal Name:	<a href="#">Journal of Pharmaceutical Research International</a>
Manuscript Number:	Ms_JPRI_125144
Title of the Manuscript:	Analytical Method Development and Validation of Beclomethasone, Clotrimazole, Ofloxacin, Lidocaine by RP-HPLC in Combination Dosage Form.
Type of the Article	Research Article

### Review Form 3

#### PART 1: Review Comments

<b>Compulsory</b> REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	I find these manuscripts important in the way that the combination of drugs used in these medications covers the major areas of pain responsible for causing the ear infection. Which makes it more durable drug for the ear infection. Moreover, the combination of drugs is older drugs used from many years which may not cause any allergic reactions to the patients with ear infection.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes, the title is suitable with one minor change change stated below: Analytical Method Development and Validation of Beclomethasone, Clotrimazole, Ofloxacin, Lidocaine by RP-HPLC in Combined Dosage Form.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Yes	
Are subsections and structure of the manuscript appropriate?	In the manuscript description of drugs like structure and little bit more elaboration is needed in the subsections of all the drugs.	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	The manuscript's extensive literature review, thorough data analysis, and well-defined methodology all exhibit scientific robustness. The authors guarantee the reproducibility and dependability of the results by using tried-and-true experimental procedures and provide thorough explanations of their procedures. Furthermore, the findings' validity is increased because the statistical techniques employed are suitable for the type of data. All things considered, the work adds significant knowledge to the subject and is supported by both empirical data and a sound theoretical framework.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	The references used in this article are good and recent. Since the drugs used in this combination is old enough so more supporting references can be taken into consideration.	
<b>Minor</b> REVISION comments  Is the language/English quality of the article suitable for scholarly communications?	The English is good, spellings errors needs to be checked.	
<b>Optional/General</b> comments	Overall, the manuscript is good with some of the minor changes that can be done.
