Journal Name:	<a href="#">Journal of Scientific Research and Reports</a>
Manuscript Number:	Ms_JSRR_124738
Title of the Manuscript:	<b>Spatial Distribution and Disease Incidence of Guava Wilt in the Prayagraj Region: Block and Village Survey Across Prayagraj and Kaushambi</b>
Type of the Article	

### Review Form 3

#### **PART 1:** Review Comments

<b>Compulsory</b> REVISION comments	<b>Reviewer's comment</b>	<b>Author's Feedback</b> <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<b>Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.</b>		
<b>Is the title of the article suitable? (If not please suggest an alternative title)</b>		
<b>Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.</b>		
<b>Are subsections and structure of the manuscript appropriate?</b>		
<b>Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.</b>		
<b>Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.</b> :		

**Review Form 3**

<p>Minor REVISION comments</p> <p><b>Is the language/English quality of the article suitable for scholarly communications?</b></p>		
<p><b><u>Optional/General</u></b> comments</p>	<p><b>Some useful comments and feedback</b></p> <p>1- <b>In general</b>, the paper's idea looks nice, despite that the idea of this paper looks simple and familiar. However, there are some coming comments and revisions that should help to revise this manuscript.</p> <p>2- The address needs to be changed and shorter (e.g) { <b>Spatial Distribution and Disease Incidence of Guava Wilt Village Survey Across Prayagraj and Kaushambi, India. }</b> }</p> <p>3- The manuscript language looks fine, but it may need to be checked by an English expert as much as if possible. There are some vocabulary and grammar mistakes. Some sentences need to be rewritten.....!</p> <p>4- Although, the abstract is clear but needs to be rewritten carefully.</p> <p>5- <b>The keyword</b> looks good....</p> <p>6- <b>The introduction</b>, in general, is fine but it needs to shorten some sentences that look a bit long. Also, there is no need for deep details and repeated ones.... For example, this sentence [Guava (<i>Psidium guajava</i> L.) is an important fruit crop in tropical and subtropical regions, including India, where it is cultivated across nearly all states (Misra, 2006). Native to Mexico, Central America, the Caribbean, and northern South America (Amusa et al., 2005), guava is a small tree belonging to the Myrtaceae family, with a chromosome number of <math>2n=22</math> (Singh, 2001).]..... that's too much and kind of very long sentence. Please shorten it as much as you can with keeping the general meaning.</p> <p>7- <b>The introduction</b> is short, and I think I did not cover most of the study projects.</p>	

**Review Form 3**

	<p>8- Either the hypotheses (study projects) or the central hypothesis was not mentioned...? The author may say something like (the aim of the study was.... The study aimed to.....).</p> <p>9- Some of the references are too old and the author(s) needs to cite some new references.</p> <p>10- <b>Material and methods ....</b></p> <p>11- Some sentences are not very clear and need to be direct and obvious. I think the methodology did not cover the whole study.....</p> <p>1. <b>Statistical analysis</b> is not in the manuscript if it is necessary...the author(s) did not mention how they did the math intact. How we could know how you did it....?.</p> <p>8 <b>Results and discussion</b></p> <p>12- Results and discussion are good in general, but the may need to be clear and Grammarly correct.... As I mentioned earlier English language needs more care....</p> <p>13- Acknowledgment is not mentioned .....</p> <p>14- Some references need to be consistent ....</p> <p>Finally, there is no doubt this work required some effort to get done so thank you for this work and good look at revising this manuscript.....</p>
