Journal Name:	International Journal of Environment and Climate Change
Manuscript Number:	Ms_IJECC_125792
Title of the Manuscript:	Influence of rainfall and land configuration on pearl millet grown under irrigated conditions with saline water
Type of the Article	

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	This study investigates the critical interactions between rainfall, land configuration, and saline irrigation on pearl millet productivity. Findings will inform climate-resilient agricultural practices, enhancing crop yields and water management in arid regions. Understanding these relationships is vital for optimizing irrigation strategies and mitigating soil salinization. Results will contribute to sustainable agriculture and food security in water-scarce environments.	
Is the title of the article suitable? (If not please suggest an alternative title)	YES	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Addition of MxS and SxM interaction effect, kindly mention proper units with the data, spelling correction, mention all the references	
Are subsections and structure of the manuscript appropriate?	YES	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	This manuscript is scientifically correct as it is in accordance with various other research findings. The research data supports the literature regarding pearl millet's adaptation to survive moisture stress conditions.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	YES	
Minor REVISION comments Is the language/English quality of the article suitable for scholarly communications?	YES	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
