

Review Form 3

Journal Name:	Journal of Advances in Mathematics and Computer Science
Manuscript Number:	Ms_JAMCS_125058
Title of the Manuscript:	Effective Management of COVID-19 in Nigeria: Investigating the Impact of Treatment and Prevention
Type of the Article	Original Research Article

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	This manuscript is important for the scientific community because it provides valuable insights into the unique challenges and responses to managing COVID-19 in a developing country context like Nigeria. It highlights the interplay between treatment and prevention, drawing attention to the socio-economic factors that affect public health interventions. I appreciate the manuscript for its comprehensive analysis, which not only assesses the healthcare infrastructure but also emphasizes the need for targeted policies that balance health and economic needs. However, I believe a stronger focus on long-term strategies and more comparative analysis with other regions could further enrich the discussion.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Yes	
Are subsections and structure of the manuscript appropriate?	Yes	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	This manuscript appears to be scientifically robust and technically sound because it employs evidence-based approaches to assess the impact of COVID-19 management strategies in Nigeria. The analysis is grounded in well-established public health frameworks, evaluating both treatment and prevention efforts while accounting for socio-economic variables. The use of data to highlight disparities in healthcare access between urban and rural areas demonstrates a clear understanding of the context. Additionally, the manuscript's reliance on vaccination rates, treatment protocols, and prevention strategies reflects an adherence to global scientific standards, ensuring the validity of its conclusions.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Yes	
Minor REVISION comments		
Is the language/English quality of the article suitable for scholarly communications?	No	
Optional/General comments	No
