<p>Minor REVISION comments</p> <p>Is the language/English quality of the article suitable for scholarly communications?</p>	<p>Yes</p>	
<p>Optional/General comments</p>	<p>This paper presents a case report of a 45-year-old Caucasian male who underwent three surgical procedures to treat facial trauma. To enhance the report's informativeness, I recommend incorporating additional details on the following aspects:</p> <p>1, Rationale for Multiple Surgeries: Please elaborate on the reasons why three surgeries were required. Was it due to the severity of the trauma, complications, or other factors?</p> <p>2, Comparison to Previous Literature: A comparison with existing case reports on similar facial trauma cases would provide valuable context and highlight any unique aspects of this case.</p> <p>3, Case-Specific Considerations: Please discuss key points and considerations specific to this patient, including the surgeon's thought process, unique surgical strategies employed, and any challenges encountered.</p> <p>By addressing these points, you can significantly enrich the case report and offer a more comprehensive understanding of the patient's treatment and outcomes.</p>
