Type of the Article	Case Report

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	Every case is unique and if informatins noted in details,help surgeons to better treat the patients specially severe cases.	
Is the title of the article suitable? (If not please suggest an alternative title)	I think no.maxilla did not undergone maxillectomy and it has been avulsed and undewent necrosis due to initial malpractice,so maxilla lossing and necrosis happened.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Yes overall.	
Are subsections and structure of the manuscript appropriate?	Yes,acceptable.	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	It has mistakes that I commented about them.initial surgery leaded to malpractice and author must explains some thinge sbout last treatment that I noted.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form. :	Acceptable.	

Review Form 3

<p>Minor REVISION comments</p> <p>Is the language/English quality of the article suitable for scholarly communications?</p>	<p>Yes overall .some corrections make it better.</p>	
<p>Optional/General comments</p>	<p>1-I highlighted everywhere that needed and commented. 2-initial fx type Dx , must be noted according to usual classification. 3- author must explain about initial malpractice and suggest his or her recommendation. 4- frontal cut of 3D view must be included , before and after the surgeries. 5-disscusion is very weak and need many changes that I commented. 6-repeated sentences must be deleted or at least in different sections. 7-tye of connection between implants and dentures must be noted in both jaws. 8- author must note the different type of treatment plan for the patient in discussion and compare them and explain about advantage and disadvantage of their treatment. 9- this manuscript needs major revise and must be more scientific and useful. 10-classification and treatment of facial fx has some rules that could be foond in text books 11- in any facial fx, maxillofacial surgeon is first surgeon ,because reduction and internal fixation according to rules, make substructure for soft tissue an appearance and function. 11-maxxilla did not undergone maxillectomy indeed, but malpractice and crushing and necrosis made losing of maxilla.</p>	

PART 2:

	<p>Reviewer's comment</p>	<p>Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</p>
