PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	This study addresses an important aspect of climate adaptation which is not considered in research or policy implementation as much as it should be. The importance of considering farmers' perception to climate adaptation is explained here very well, and the gaps in previous research are also pointed out. This paper is an important addition to climate adaptation and DRR sector.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	It is comprehensive and concise at the same time, very well articulated.	
Are subsections and structure of the manuscript appropriate?	Yes.	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	The paper used a widely used method for data analysis and explained the methodology quite well. However I do feel that the references for the Heckman method should be included in the methodology section so that the original literature can be consulted, or other researcher who have used this method can be quoted as well. Otherwise the data processing and analysis is well rounded.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form. =	They are okay.	
Minor REVISION comments Is the language/English quality of the article suitable for scholarly communications?	Yes.	
Optional/General comments	The limitation of this research should be included either in the introduction or in the conclusion.
