A minimum of 3-4 sentences may be required for this part.</p>	<p>This manuscript contributes significantly to the scientific community by exploring ecotourism's impacts on local communities in a biodiversity-rich forest area, Satchari National Park in Bangladesh. The study's focus on residents' perceptions, especially on socio-cultural, environmental, and economic factors, fills a gap in ecotourism literature specific to this region. I appreciate the manuscript for its methodological rigor and its potential to guide policymakers in balancing conservation with community development. However, further clarity on mitigating negative environmental impacts could strengthen its practical application</p> <p>SEE ATTACHMENT</p>

The study's comprehensive approach, including data collection through surveys and statistical analysis using tools like ANOVA, enhances the reliability of its findings.
