Manuscript Number:	Ms_AJMAH_125708
Title of the Manuscript:	A PROSPECTIVE COMPARATIVE STUDY OF BASKA MASK Vs I-GEL IN SHORT ELECTIVE SURGERIES UNDER GENERAL ANAESTHESIA
Type of the Article	Original Research Article

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	Concepts of newer SADs in general anaesthesia are practiced over past 6 to 8 years and it is upcoming in most of the institutes. Though the aspiration is still persisting with the use of SADs, newer SADs with its added advantages are in vast usage in clinical practice. Clinical acumen and scientifically challenging cases are done using newer SADS.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Continue the same	
Are subsections and structure of the manuscript appropriate?	Summary column can be totally deleted; since it is a repetition of the discussion part and it is needed only when it has to be presented in the thesis and no in the research article	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	Novel concept emerging and in practice in many hospitals in the Asian countries. Merits and demerits can be highlighted only when the study process is initiated in the Indian population and hence this research article sounds good.	-
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form. :	Are provided in sufficiency to the material worked out.	-

Review Form 3

Minor REVISION comments		
Is the language/English quality of the article suitable for scholarly communications?	Fairly acceptable.	
Optional/General comments	<p>I congratulate the author for submitting the original research article done in the stipulated period.</p> <p>My suggestions/comments following the scrutiny of the manuscript includes :</p> <ol style="list-style-type: none">1. Well planned and executed research work with organised manuscript with few modifications to be made.2. Literature review presented in the introduction paragraph can be omitted; it can be discussed and presented in the discussion page.3. Summary is the repetition of the discussion part and can be deleted.4. Referencing styles to follow according to the journal requisites.5. Method of randomization, concealment and blinding techniques needs to be elaborated.6. Dosage of Propofol is described in the ranges and which was chosen 2 mg or 3 mg?7. Who performed all the 90 cases – was it a consultant, faculty, senior or junior resident and how long they have experience with the use of this SADs?8. How was the intraoperative hemodynamic following CO2 insufflations and any complications encountered with alterations in positioning changes at the time of laparoscopy?9. How was the extubation response and how it was tackled?10. Tabular column are multiple and can be cut down to 3 to 4 tables with detailed presentation.
