

Review Form 3

Journal Name:	Journal of Scientific Research and Reports
Manuscript Number:	Ms_JSRR_125958
Title of the Manuscript:	“Impact of Combining Bio-inoculants along with Inorganic Fertilizers on Soil Biological characteristics in transplanted Rice (Oryza Sativa L.) Crop”
Type of the Article	

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	The impact of combining bio-inoculants with inorganic fertilizers on soil biological characteristics is profound, with far-reaching benefits for agriculture, the environment, and society. This practice improves nutrient efficiency, soil health, and crop yields while reducing environmental pollution and dependency on chemical inputs. As such, it is an important avenue for research and application in sustainable rice farming, addressing both immediate agricultural needs and long-term environmental and economic goals.	
Is the title of the article suitable? (If not please suggest an alternative title)	Synergistic Impact of Bio-Inoculants and Inorganic Fertilizer on Soil Microbial Communities in Transplanted Rice.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract must include purpose of the work and a brief conclusion	
Are subsections and structure of the manuscript appropriate?	Yes	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	The study addresses fundamental aspects of cultivation that can optimize productivity. The methodology ideally includes detailed experimental design, statistical analysis, and controls to ensure valid and reproducible results. The combination of bio-inoculants and inorganic fertilizers can contribute to increasing global food production in a sustainable manner. As the global population grows, efficient agricultural practices that maintain soil health while enhancing productivity are essential for ensuring food security.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	More recent references should be added and exclude the references which are older than 2000 if not necessary.	

Review Form 3

Minor REVISION comments Is the language/English quality of the article suitable for scholarly communications?	Yes, but there is scope of improvement.	
Optional/General comments	The paper could be more comprehensive if there are some figures and tables and also explained elaborately.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
