## Review Form 3

### PART 1: Review Comments

<b>Compulsory</b> REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	This manuscript is important to the scientific community because the research aims to understand the level of coconut producer's knowledge on the various opportunities and trends related to the coconut export industry. I am interested in this research as this industry contributes to the growth of a country and the various multiplier effects associated with it such as employment, welfare to name a few.	
Is the title of the article suitable? (If not please suggest an alternative title)	It is a bit wordy – try to rephrase to bring more clarity.  A better title would be: The Present and Future of the Coconut Export Industry: A Case of Sri Lanka.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract need to be refined. I can see gender specific information which is not required. Too wordy. Need to be short and simple.	
Are subsections and structure of the manuscript appropriate?	Certain sections such as Literature Review is missing which is an integral part of the research to identify the gaps which are addressed through the research question.	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	Satisfactory. This research is important for policy purposes.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	More references are required. This will come from the Literature Review on this area.	
Minor REVISION comments	Satisfactory, however, if it can be proof read then it is better.	
Is the language/English quality of the article suitable for scholarly communications?		
<b>Optional/General</b> comments	No issues.
