

Review Form 3

Journal Name:	South Asian Research Journal of Natural Products
Manuscript Number:	Ms_SARJNP_125919
Title of the Manuscript:	Screening of potential cancer inhibitors using Curcuma longa (Turmeric) extract through molecular docking, adme and DFT methods
Type of the Article	

General guidelines for the Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guidelines for the Peer Review process, reviewers are requested to visit this link:

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	The article brings innovation to the use of Curcuma longa, which makes it interesting and important for the medical and biotechnology fields. Any study that has the potential to improve the quality of life of the population is recognized as good.	
Is the title of the article suitable? (If not please suggest an alternative title)	The title reflects the aim of the article, highlighting its importance to medicine	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	the abstract translates the study with important details regarding the phytochemical properties of the extract in different extractants (alcohol and chloroform). Future studies should analyse the toxicity of these extracts and try to confirm their use in pharmacy.	
Are subsections and structure of the manuscript appropriate?	The structure of the article is appropriate, it shows the sequence of the study and the objectives that have been achieved.	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	The study of possible phytotherapy's has grown worldwide, and this has led us to look for new applications for these extracts that could lead to the creation of new treatments. These studies, when well conducted, show compounds that could be applied to new pharmaceuticals and varied applications, and reinforce the need for more and better research. The work presented is of excellent scientific quality.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Most of the references are current and reflect the way the study was conducted. The methods described in the references show the dedication of the team that carried out the work.	
-		
Minor REVISION comments		
Is the language/English quality of the article suitable for scholarly communications?	The language of the article is clear enough, and at a good level of English	
Optional/General comments	The article has aroused the interest of researchers who have also been working with Curcuma longa, looking at other ways of using extracts of this plant and increasing their potential uses.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
