Minor REVISION comments		
Is the language/English quality of the article suitable for scholarly communications?		
Optional/General comments	Here are my general comments: The paper focuses on the uses of C. zizanioides but lacks a research approach. Furthermore, all the data provided in the manuscript is secondary data. It is important to note that there have been numerous research articles published on the same species. The manuscript lacks consistency, and the reference section should follow a specific pattern, either alphabetically or based on the year of publication. The manuscript requires major revision.
