

Review Form 3

Journal Name:	Advances in Research
Manuscript Number:	Ms_AIR_125725
Title of the Manuscript:	INDOOR ENVIRONMENTAL QUALITY IN PUBLIC HEALTH FACILITIES IN GHANA: A STUDY ON THE CURRENT STATE AND CHALLENGES
Type of the Article	

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	The title of the manuscript seems good and new in the era. The aim of the study was to examine the indoor environmental quality in public health facilities which is important subject for study and the result could be useful for health care managers and designers too.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes, the title is good and interesting.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract is comprehensive for the study, however the researcher could write one or two sentence about the importance of the study in Ghana too (mention why it is important to do this study or what as the problem in the first place).	
Are subsections and structure of the manuscript appropriate?	Yes, the study had a good structure, but the researcher also can add limitation part, which could be helpful for future studies in the field.	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	This study has good research design, but there are some parts that researcher can add for better result. This study is a mix method study, that means for data collection the research use both interview and survey. It is necessary for researcher to mention about the survey (the validity and reliability of the survey is important, so the researcher need to have reference for survey (the prior studies that applied the survey)). How the people are participate in the interview? What was the questions? Where the questions come from? These are need to be mention in the study for better understanding Moreover, the conclusion is too short, the researcher need to add more evidence and support (prior studies) to support the results.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form. -	Yes, the usage of references is good and up to date	
Minor REVISION comments		
Is the language/English quality of the article suitable for scholarly communications?	The quality of the English is good	
Optional/General comments
