PART1:ReviewComments

Compulsory REVISIONcomments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.</p>	<p>Clarity: The conclusion should be concise and reiterate key findings or challenges.</p> <p>Original: unfortunately, none of those approaches guarantees a successful resolution of the ulcer and prevention from recurrences.</p> <p>Suggested: Unfortunately, there is no definitive treatment to ensure complete resolution or prevent recurrences in cases of Mooren's ulcer.</p>	
<p>Is the title of the article suitable? (If not please suggest an alternative title)</p>	<p>Suggestion: Capitalize "Mooren's Ulcer" and ensure the title is concise and reflective of the case report.</p> <p>Original: Aims: To report the case of a patient with bilateral Mooren's ulcer following a pterygium surgery and to highlight the difficulty of its management.</p> <p>Suggested: Bilateral Mooren's Ulcer Following Pterygium Surgery: Challenges in Management.</p>	
<p>Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.</p>	<p>INTRODUCTION-Sentence Structure: Some sentences can be made more concise or clearer.</p> <p>Original: It can be unilateral or bilateral, characterized by the presence of a peripheral painful corneal ulcer, which progresses circumferentially and centrally, destroying the corneal stroma, and leaving only a thin fibrovascular membrane behind.</p> <p>Suggested: Mooren's ulcer may be unilateral or bilateral and is characterized by a painful peripheral corneal ulcer that progresses circumferentially and centrally, destroying the corneal stroma and leaving only a thin fibrovascular membrane</p>	
<p>Are subsections and structure of the manuscript appropriate?</p>	<p>Medical Details: Fundus and Hematological Findings:</p> <p>Original: Fundus examination was unremarkable.</p> <p>Suggested: Fundus examination of the left eye was unremarkable.— To specify which eye you are referring to, as the right fundus examination was not accessible.</p> <p>Medical Terminology: Clarity of Ophthalmological Descriptions:</p> <p>Original: Ophthalmological examination revealed a distance visual acuity of hand motion perception in the right eye and 5/10 in the left.</p> <p>Suggested: Ophthalmological examination revealed a visual acuity of hand motion perception in the right eye and 5/10 in the left</p>	
<p>Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.</p>	<p>DISCUSSION-LANGUAGE AND GRAMMAR: Sentence Structure: Some sentences can be more concise and formal. For example:</p> <p>Original: Mooren's ulcer is an uncommon cause of peripheral ulcerative keratitis (PUK) which is characterized by a painful, relentless, chronic ulcerative keratitis that</p>

	begins peripherally and progresses circumferentially and centrally, with minimal or	
	<p>no scleral involvement.</p> <p>Suggested: Mooren's ulcer is an uncommon cause of peripheral ulcerative keratitis (PUK) characterized by a painful, progressive ulcerative keratitis that begins peripherally and advances circumferentially and centrally, with minimal or no scleral involvement.</p> <p>Conclusion and Emphasis:</p> <p>Strengthening the Conclusion: The conclusion could be more concise while emphasizing the importance of early intervention.</p> <p>Original: Despite an intensive care, the prognosis of Mooren's ulcer and its recurrences are still a big issue; therefore, an early diagnosis and proper treatment are essential to prevent a devastating outcome.</p> <p>Suggested: Despite intensive care, Mooren's ulcer carries a poor prognosis with frequent recurrences. Early diagnosis and appropriate treatment are crucial to prevent severe outcomes.</p> <p>Conclusion-Refinement and Precision</p> <p>This case highlights the complexity involved in managing Mooren's ulcer. To date, no consensus exists on the most appropriate treatment approach. The current practice of employing a stepwise approach, tailored to the patient's individual characteristics, will need to continue.</p>	
Are there references sufficient and recent? If you have suggestions of additional references, please mention them in the review form. -	Uses software for citation for eg: Mendeley.	
<u>Minor REVISION</u> comments	Basic grammatical errors should be avoided.	
Is the language/English quality of the article suitable for scholarly communications?		
<u>Optional/General</u> comments	NA	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
