

Review Form 3

Journal Name:	Chemical Science International Journal
Manuscript Number:	Ms_CSIJ_126158
Title of the Manuscript:	Transition metal complexes [Mn(II), Co(II), Ni(II), Cu(II) and Zn(II)] with ligands containing 2-hydrazinobenzo thiazole and 2-methoxyacetophenone units
Type of the Article	

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	Metal complexes of thiazoles Schiff ligand are promising bioactive heterocyclic compounds, and can be suggested and studied for their potential pharmaceutical properties.	
Is the title of the article suitable? (If not please suggest an alternative title)	No, what is the benefit of mention names of ketone and hydrazine which together form ligand, it is better to replace title by" synthesis and identification of metal complexes of E-1-(benzo[d]thiazol-2-yl)-2-(1-(2-methoxyphenyl) ethylidene)hydrazine with Mn(II), Co(II), Ni(II), Cu(II) and Zn(II)" .	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Yes.	
Are subsections and structure of the manuscript appropriate?	Yes.	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	Author introduced his (her) work in a logic and organized sequence. With comprehensive abstract, simple and clean preparation procedures (with high product yield %), finally scientific explanation of the resulted identification data.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form. -	Yes.	

Review Form 3

Minor REVISION comments Is the language/English quality of the article suitable for scholarly communications?	Yes, it is easy and understandable language, but: -mention the apparatus which used in a separated item and do not immerge with materials and procedure subsection. -in materials and procedures subsection, insert specifications of solvent, which used in procedures of ligand and complexes synthesis processes. -how could you know that reaction is ended unless TLC is performed. -where recrystallization step of final products for ligand and complexes purification step and preventing any interferences in identification data. -cite references in synthesis procedure of ligand and complexes such as : for ligand procedure cite the following references which includes similar procedure and ligands: Alang G, Kaur G, Kaur R, Singh A, Tiwari R, "Synthesis, Characterization, and Biological Evaluation of certain 6-methyl-2(3H)-benzo-1, 3-thiazolyl-1'-ethylidene-2-(o, p-Substituted Acetophenones) Hydrazine Analogs", Journal of Young Pharmacists, 2010;2(4): 394-398.	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
