

Review Form 3

Journal Name:	Asian Journal of Environment & Ecology
Manuscript Number:	Ms_AJEE_126123
Title of the Manuscript:	Investigation of the physical and chemical characteristics of effluents collected from the textile region of Bagru, Jaipur (Rajasthan, India)
Type of the Article	Research

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	The manuscript titled "Investigation of the Physical and Chemical Characteristics of Effluents Collected from the Textile Region of Bagru, Jaipur (Rajasthan, India)" is crucial for the scientific community as it addresses significant environmental concerns related to textile waste management. The study offers useful information on the composition of the effluent, which can help industry and local governments decide what needs to be done to reduce pollution. I value the thorough technique used in the study since it highlights the problem's complexity by combining chemical and physical assessments.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	It might use some improvements; the abstract is usually thorough. I think the abstract would be more powerful if it included a phrase discussing how these findings affect environmental management in the textile sector.	
Are subsections and structure of the manuscript appropriate?	I provide the following suggestions: <ol style="list-style-type: none"> 1. Go through some current published studies on the effects of textile effluents on the environment, especially in similar geographic settings. 2. reviews or meta-analyses that go through the wider implications of managing textile waste. The conclusion is not complete; to make it more scientific: add more suggestions to treat the textile effluent to reduce the harmful impact on environment.	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	The findings' credibility can be further supported by the incorporation of pertinent literature and comparisons with previous research, which will provide a strong basis to the conclusions.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form. =	Add some recent (2-5 years old) references. Some references are so old.	
Minor REVISION comments		
Is the language/English quality of the article suitable for scholarly communications?	Yes	
Optional/General comments	-	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
