Journal Name:	<a href="#">European Journal of Nutrition &amp; Food Safety</a>
Manuscript Number:	Ms_EJNFS_125407
Title of the Manuscript:	<b>Biofortification of Crops: A Nutritional Strategy for Combating Malnutrition- A review</b>
Type of the Article	<b>Review Article</b>

### Review Form 3

#### PART 1: Review Comments

<b>Compulsory</b> REVISION comments	<b>Reviewer's comment</b>	<b>Author's Feedback</b> (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p><b>Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.</b></p>	<p>The study provided a scientific methodology about Biofortification of Crops by Nutritional Strategy for Combating Malnutrition. This strategy targets essential micronutrients such as iron, zinc, and provitamin A, particularly in regions where diets are predominantly based on nutrient-poor staple foods. Biofortified crops, such as vitamin A-enriched sweet potatoes and iron-rich beans, have demonstrated significant improvements in nutrient intake and health outcomes, including reduced anemia and enhanced child growth.</p>	
<p><b>Is the title of the article suitable? (If not please suggest an alternative title)</b></p>	<p>No</p>	
<p><b>Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.</b></p>		
<p><b>Are subsections and structure of the manuscript appropriate?</b></p>	<p>The study needs to include some charts or tables to clarify the rates of hidden hunger in certain countries, and to determine from previous studies the impact of food fortification on this phenomenon, as well as which of the three mentioned methods is more effective in combating hidden hunger or malnutrition. It is possible to clarify the effect of improving the nutrition of agricultural crops with the optimal limits of nutrients on Biofortification. It is also possible to clarify which of the methods of Biofortification is better and more effective on public health in the long term. One of the three methods may be more effective, but it has a bad effect in the long term. .</p>	
<p><b>Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.</b></p>	<p>The review article is accepting both technically and scientifically, as it is well-written, though it does require some improvementsThe study provided a scientific methodology about Biofortification of Crops by Nutritional Strategy for Combating Malnutrition. This strategy targets essential micronutrients such as iron, zinc, and provitamin A, particularly in regions where diets are predominantly based on nutrient-poor staple foods. Biofortified crops, such as vitamin A-enriched sweet potatoes and iron-rich beans, have demonstrated significant improvements in nutrient intake and health outcomes, including reduced anemia and enhanced child growth.</p>	
<p><b>Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.</b></p>		
<p><b>Minor</b> REVISION comments</p> <p><b>Is the language/English quality of the article suitable for scholarly communications?</b></p>	<p>Yes</p>	
<p><b>Optional/General</b> comments</p>	<p>There are some corrections that researchers should pay attention to:</p> <ul style="list-style-type: none"> <li>▪ . Add some tables or graphs that enhance the existing information</li> <li>▪ <input type="checkbox"/> Be careful to avoid repetition while writing</li> <li>▪ <input type="checkbox"/> Explaining, based on the above-mentioned data, the most important ways to combat malnutrition</li> </ul>
