

Review Form 3

Journal Name:	Journal of Advances in Medicine and Medical Research
Manuscript Number:	Ms_JAMMR_124102
Title of the Manuscript:	Prevalence and factors influencing the circulation of pulmonary tuberculosis in patients followed at the National Tuberculosis Control Program in N'Djamena, Chad
Type of the Article	Original Research Article

PART 1: Review Comments

<u>Compulsory</u> REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	This manuscript is important for the scientific community as it offers a comprehensive analysis of TB prevalence and drug resistance in N'Djamena, Chad, highlighting significant public health challenges. It identifies key risk factors such as age, occupation, and drug resistance, which are crucial for developing targeted intervention strategies. The data provided can guide future research and inform public health policies in similar settings. I value this manuscript for its detailed findings, although it would benefit from a more in-depth discussion of its limitations and broader implications.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Conclusion missing	
Are subsections and structure of the manuscript appropriate?	Yes	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	This manuscript is scientifically robust due to its use of GeneXpert for accurate TB diagnosis and its prospective study design, which ensures the data is current and relevant. The detailed analysis of prevalence, age distribution, and drug resistance adds to its technical soundness and provides a comprehensive understanding of TB in N'Djamena. The methodological rigor and clear presentation of findings enhance the manuscript's credibility and value to the scientific community.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Kindly add some recent references. References arrange according to serial. Example [1],[2],[3],[4].....in the manuscripts (From introduction to discussion)	
<u>Minor</u> REVISION comments Is the language/English quality of the article suitable for scholarly communications?	45 % language score as per wiley editing service	
<u>Optional/General</u> comments
