

Review Form 3

Journal Name:	Asian Journal of Research in Animal and Veterinary Sciences
Manuscript Number:	Ms_AJRAVS_124402
Title of the Manuscript:	Diversity and abundance of chiropteran ectoparasites in Abidjan district, Côte d'Ivoire
Type of the Article	Original Research Article

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	Overall, the manuscript is lost in the results and content it sets out to show. Therefore, the manuscript needs to be completely rewritten so that the results fit the title, introduction, and discussion. The authors have included different information, but none of it has any bearing on the results that were actually obtained.	
Is the title of the article suitable? (If not please suggest an alternative title)	No, the title needs to match the results, but since it was not stated whether there are new records of the location or not, it is difficult to arrive at a common title. Are these new records? Or is it just expanding the distribution?	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	I have put all my suggestions in the attached file.	
Are subsections and structure of the manuscript appropriate?	No. There is a lot of information missing, all of which has been added in this attached manuscript.	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	All missing information has been placed in the attached file. Due to the various flaws in the manuscript, it leaves the reader with doubts regarding the identification of the two species of ectoparasites.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Just one reference has problem, highlighted in the manuscript.	

Review Form 3

Minor REVISION comments Is the language/English quality of the article suitable for scholarly communications?	No. The entire MS need to be corrected by a native speaker. A lot of words in French, also.	
Optional/General comments	As it stands the manuscript needs to be rejected, to be completely restructured. My comments are in the attached document.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
