

Review Form 3

Journal Name:	Journal of Engineering Research and Reports
Manuscript Number:	Ms_JERR_126182
Title of the Manuscript:	Real-Time Data Governance and Compliance in Cloud-Native Robotics Systems
Type of the Article	Journal

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.</p>	<p>This manuscript addresses the different types of issues of real-time data governance in cloud-native robotics and highlights the significance of data integrity and regulatory compliance like EU-GDPR, this manuscript is very important reading for the scientific community and researchers. Given the significant impact that cybersecurity threats have on governance failures, its conclusions demand a reconsideration of current practices. I like its in-depth research and practical insights, which can help create more effective frameworks for data management in rapidly evolving technology environments.</p>	
<p>Is the title of the article suitable? (If not please suggest an alternative title)</p>	<p>Yes</p>	
<p>Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.</p>	<p>May be the author can add more sentences about cloud security also.</p>	
<p>Are subsections and structure of the manuscript appropriate?</p>	<p>Yes, the manuscripts are done very well</p>	
<p>Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.</p>	<p>This manuscript is scientifically important because it uses credible sources of data and its analytical techniques that involve regression and correlation analyses. The low error rate and latency metrics further prove the reliability of the findings regarding data integrity. On the whole, this comprehensive approach addresses all the complexities of data governance in cloud-native robotics systems.</p>	
<p>Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.</p>	<p>Yes, the references are more recent and almost all the references are included, very good.</p>	
<p>Minor REVISION comments</p> <p>Is the language/English quality of the article suitable for scholarly communications?</p>	<p>Clarity and Readability: The language is largely clear and concise but fails to convey elaborate ideas regarding data governance compliance in most cases. Some sentences, therefore, need to be made more straightforward to help in reading, especially from sections with long descriptions.</p> <p>Terminological arrangements: Technical terms and empirical formulas have appropriately been used in the text. So Highly recommended paper for researchers and other area.</p> <p>Small corrections to the punctuation and sentence structure would improve the flow and eliminate any potential ambiguity in the arguments themselves.</p>	
<p>Optional/General comments</p>	<p>Highly recommended</p>	

Review Form 3

PART 2:

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>	

Reviewer Details:
