Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	The study provides an analysis of the adoption of the Paramparagat Krishi Vikas Yojana (PKVY) program in Bikaner, Rajasthan, a region known for its minimal use of agro-chemicals due to water scarcity and crop failure risks. The study results indicated that most farmers showed a moderate level of PKVY adoption, with high adoption of nutrient management practices but a low adoption of technical knowledge aspects. Additionally, key factors such as education, mass media exposure, and information-related behaviors were significantly associated with PKVY knowledge and adoption levels among respondents. This suggests that greater educational outreach and access to information could further support PKVY's effectiveness in the region.
