

Review Form 3

Journal Name:	Asian Journal of Biochemistry, Genetics and Molecular Biology
Manuscript Number:	Ms_AJBGMB_123907
Title of the Manuscript:	Evaluating the serum Zinc and Testosterone levels of carpenters in Enugu metropolis, South East Nigeria: Findings from a cross-sectional study
Type of the Article	Original Research Article

Review Form 3

PART 1: Review Comments

<u>Compulsory</u> REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	<ul style="list-style-type: none"> It explores a specific health aspect - serum zinc and testosterone levels within a targeted occupational group. It offers valuable insights into how workplace environments can impact biochemical markers and overall health. Personally liked the topic selection 	
Is the title of the article suitable? (If not please suggest an alternative title)	<p>Yes</p> <p>Suggestion – it can be written as “ Evaluating the serum Zinc and Testosterone levels of carpenters in Enugu metropolis, South East Nigeria: A cross-sectional study”</p>	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	<p>Yes</p> <p>Written well</p>	
Are subsections and structure of the manuscript appropriate?	Yes appropriate	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	<ul style="list-style-type: none"> This manuscript is scientifically robust and technically sound due to its detailed methodology, ensuring accurate measurement and analysis of serum zinc and testosterone levels. Additionally, the study's data collection and ethical considerations enhance its credibility and reliability. 	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	References are relevant but not recent.	
<u>Minor</u> REVISION comments		
Is the language/English quality of the article suitable for scholarly communications?	Yes	
<u>Optional/General</u> comments	<ul style="list-style-type: none"> Years of exposure to saw dust can be added Anthropometric measurements mentioned as done but not included in results and tables. Methodology can be written in 1 or 2 paragraph. Alignment can be checked.
