<b>Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.</b>	Network sampling is crucial for understanding the prevalence of abortion among female students in Nigerian tertiary institutions due to its ability to capture the social connections and influences that traditional survey methods might miss. By focusing on networks within these institutions, researchers can gain insights into how peer relationships, social norms, and access to information or support impact abortion rates. This approach allows for a more nuanced understanding of the issue, revealing patterns and factors that are deeply embedded in the social fabric of student life, which can lead to more effective interventions and policies tailored to the specific needs and contexts of these communities.
