### Review Form 3

#### **PART 1: Review Comments**

<b>Compulsory</b> REVISION comments	<b>Reviewer's comment</b>	<b>Author's Feedback</b> (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.</b>	This manuscript is important for the scientific community provided some addition points such as adverse drug reactions from the anti-retroviral drugs and opportunistic infection drugs and also the follow up study from the patients as it's a two-year review work.	
<b>Is the title of the article suitable? (If not please suggest an alternative title)</b>	The title can be more work specific rather than a descriptive one.	
<b>Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.</b>	The abstract is ok.	
<b>Are subsections and structure of the manuscript appropriate?</b>	The subsections of the manuscript are ok for the current topic depending on how the revisions are forwarded to the author.	
<b>Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.</b>	The topic of the article is scientifically important in a country like Senegal as the rate of HIV cases is very high in African nations. But the manuscript could be made more scientific including the significance of the treatment, adverse drug reactions from the drugs etc. The case collection form can also be attached in the manuscript. The inclusion and the exclusion criteria should be properly mentioned. The ethical permission number for the study should be visible in the manuscript.	
<b>Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.</b> :	Wikipedia cannot be used as a reference for a scientific article as mentioned in number 1. Citation style for science papers includes: APA (American Psychological Association) style, Harvard, Vancouver Style, MLA style, and Turabian style. Kindly follow any one of this.	
<b>Minor</b> REVISION comments  <b>Is the language/English quality of the article suitable for scholarly communications?</b>	The English language can be further elevated with removal of some common grammar mistakes and most importantly repeat of words should be avoided.	
<b>Optional/General</b> comments		

#### **PART 2:**

	<b>Reviewer's comment</b>	<b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Are there ethical issues in this manuscript?</b>	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
