Manuscript Number:	Ms_AJRS_120048
Title of the Manuscript:	Management of intracranial arteriovenous malformations: Experience of the neurosurgery department of Specialty Hospital-Rabat.
Type of the Article	

**PART 1: Review Comments**

<b>Compulsory</b> REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write few sentences regarding the importance this manuscript for scientific community. Why do you like (or dislike) this manuscript? Minimum 3-4 sentences may be required for this part.	It is an important pathology, can be life threatening or has disability as a consequence of complications if not detected and treated in time. The data is robust, but the presentation needs improvement. Grammar and English need to be checked. Publication is not in PPT format, bullets and arrows.It needs to be rewritten. Font is different in some parts. Plagiarism check to be done as at some point, copy-paste is there.	
Is the title of the article suitable? (If not please suggest an alternative title)	Management of cerebral arteriovenous malformations – Experience of a tertiary care centre of Rabat	
Is the abstract of the article comprehensive? Do you suggest addition (or deletion) of some points in this section? Please write your suggestions here.	Can be shortened and presented as Introduction, methods, results and conclusion.	
Are subsections and structure of the manuscript appropriate?	Needs to be written in paragraphs, without repetition of same results, same font and categorize discussion according to results of study. Describe results according to severity of lesion and whose pictures you are showing. Tables and charts to be rewritten.	
Please write few sentences regarding the scientific correctness of this manuscript. Why do think that this manuscript is scientifically robust and technically sound? Minimum 3-4 sentences may be required for this part.	AVM's are an important cause of morbidity and mortality. Presenting data of 30 patients will definitely add to literature. Manuscript can have a better discussion. Is there any female with pregnancy, that will be interesting to know. Correlate presentation, imaging, treatment and outcome according to grade of AVM	
Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. -	yes	

**Review Form 3**
