

Review Form 3

Journal Name:	International Journal of Research and Reports in Hematology
Manuscript Number:	Ms_IJR2H_124813
Title of the Manuscript:	Levels of neutrophils, interleukin-10 and tumor necrosis factor-alpha amongst people living with coinfection of hiv and malaria in Benin City, Edo state.
Type of the Article	Original Research Article

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	It's good because mentioned diseases are common in Africa and had high burden Also delay or missed treatment will increase mortality and morbidity	
Is the title of the article suitable? (If not please suggest an alternative title)	Add where &when conducted completely Nigeria etc Capitalized each word except and , of ,on Co-infection , Adults Nigerian Patients Levels of neutrophils, interleukin-10 and tumor necrosis factor-alpha amongst Adult Nigerian Patients with coinfection of hiv and malaria in Benin City, Edo state , Nigeria	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	<ul style="list-style-type: none"> - Where the introduction , problem statement - Study Design: Cross-sectional study design was used for the study(deleted) - Study Design: Cross-sectional study design was used for the study - Place and Duration of Study: The research project was carried out at the University of Benin Teaching Hospital (UBTH) in Benin City, Nigeria. The study lasted for a period of six months (From January, 2024 to June, 2024).already added to methodology - while neutrophil percentages were significantly reduced in coinfectd individuals (51.71%) compared to those with HIV (59.23%, p < 0.001) and malaria (57.74%, p = 0.001).this is from result part . Neutrophil percentages were significantly lower in the HIV-Malaria coinfection group compared to the HIV-only group . this is from conclusion part - key words add neutrophils 	
Are subsections and structure of the manuscript appropriate?	Not appropriate No rationale , no objectives general and specific , no previous studies In methodology : no study design , no study duration , no ethical approval in this section 2.4 equipment ; not enough , need more information	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	In general it is good but need to correct all points mentioned above to give more value to the manuscript	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form. :	Reasonable	

Review Form 3

<p>Minor REVISION comments</p> <p>Is the language/English quality of the article suitable for scholarly communications?</p>	<p>It is suitable</p>	
<p>Optional/General comments</p>	<p>. [8]state that neutrophils can destroy pathogens by phagocytosis,?????</p> <p>Reactive oxygen species (ROS), all capitalized extracellular traps (NETs) for neutrophils same as above</p> <p>In this study, we evaluated the levels of Neutrophils, interleukin-10, and tumor necrosis factor alpha in individuals who co-infect (ed)with HIV and malaria neutrophil counts (percentage)</p> <p>same conflict</p> <ul style="list-style-type: none"> - neutrophil percentages were significantly reduced in coinfecting individuals (51.71%) compared to those with HIV (59.23%, p < 0.001) and malaria (57.74%, p = 0.001).. Neutrophil percentages were significantly lower in the HIV-Malaria coinfection group compared to the HIV-only group 	

PART 2:

	<p>Reviewer's comment</p>	<p>Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</p>
<p>Are there ethical issues in this manuscript?</p>	<p><i>(If yes. Kindly please write down the ethical issues here in details)</i></p>
