Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	The manuscript addresses a rare presentation of a disease, which adds value to the literature, especially in fields like tropical medicine and differential diagnosis of breast lumps.	
Is the title of the article suitable? (If not please suggest an alternative title)	The word "rare" will be suitable instead of "uncommon" in the title. According to the definition, the targeted disease falls under the umbrella of Rare diseases.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Kindly add one or two sentences to each section of the abstract, like mentioning the diagnosis case, treatment/medication, and the conclusion and saying that your targeted drugs are successful for treatment.	
Are subsections and structure of the manuscript appropriate?	It is not more well organized, even if it is not a justified format. Kindly organise it appropriately. Figures are included but not discussed/cited in the paragraph. In the cytology figure, the Region of interest is not mentioned like in the ultrasound image. Put the scale on the cytology image on which the image is captured.	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	This is a good study based on clinical practice and real-world implementation, and it helps study rare diseases. The process is also suitable for confirming the diagnoses from different tests, recommending medication, and following up on recovery. For more accurate advanced research, the authors can compare the results with her aunt at a transcriptomic level to confirm that the disease was not genetically transferred.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Some statistics are required of previous similar cases and the targeted medication for other patients.	

Review Form 3

<p>Minor REVISION comments</p> <p>Is the language/English quality of the article suitable for scholarly communications?</p>	<p>Minor revisions are required so that the manuscript will be more helpful to the scientific community and precision medicine research community.</p>	
<p><u>Optional/General</u> comments</p>	<p>Comment 1: Approximately 50 grammatical and articulation errors are found, along with some typos. Kindly correct it.</p> <p>Comment 2: Good Analysis; however, poor representation even the text is not justified format.</p> <p>Comment 3: In the sentence cytology under USG guidance, Write the full form of the abbreviated word USG.</p> <p>Comment 4: Is breast filariasis a rare disease? Give some disease statistics based on targeted regions at the start of the introduction.</p> <p>Comment 5: Have the targeted drugs/medications previously been used for the same or another similar type of patient? If yes, kindly reference those cases or mention their statistics.</p> <p>Comment 6: I know that there is limited literature on the mentioned disease; however, Mention/cite some similar cases to increase the worth of your analysis. Compare your analysis with them to show your findings or deviate from the analysis.</p> <p>Comment 7: You can add more detail about the test machine or chemicals and the clinician's experience.</p> <p>Comment 8: Is there any alternative treatment? Why is this one targeted?</p> <p>Comment 9: This comment is beyond the study, but it is about following the patient for longer for better outcomes and to help the scientific community and drug discovery research</p> <p>Review 1: Approximately 50 grammatical and articulation errors are found, along with some typos.
