A minimum of 3-4 sentences may be required for this part.</p>	<p>The Vietnam Tobacco Institute has selected Oriental Hanski 227 tobacco, which has good growth ability, high yield and good quality; low susceptibility to insects and diseases; and is suitable for soil and weather conditions in Dak Lak, Vietnam. To create good quality raw materials for production in Vietnam, the Tobacco Institute has perfected the fertilizer formula, the process of growing, harvesting, drying and preserving Oriental tobacco. In addition to its growth ability, productivity, and raw material quality, the Hanski 227 variety is also rated higher than other varieties in terms of lower raw material production costs, due to its small number of harvested leaves, large leaves, and low planting density. To expand production, the Vietnam Tobacco Institute will continue to improve processing techniques and expand the Oriental tobacco production area in Dak Lak province in the coming time, in order to gradually meet the demand for Oriental tobacco raw materials.</p>

Based on the trial production results, it shows that Oriental tobacco Hanski 227 grown in Dak Lak has good growth ability, good quality raw material and has the same quality as Oriental tobacco imported from Bulgaria, Türkiye and Greece.
