

Review Form 3

Journal Name:	International Journal of Plant & Soil Science
Manuscript Number:	Ms_IJPSS_123399
Title of the Manuscript:	Effect of Potassium and Gibberellic acid on some growth parameters and yield of okra
Type of the Article	Original Research Article

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	The publication gives vital insights into the combined effects of potassium and gibberellic acid on okra growth and production, which is a key crop in many areas. The findings may be valuable to agronomists and farmers looking to increase okra production. I love the rigorous experimental design and practical application of the findings, albeit a more in-depth discussion of the more significant consequences for crop management may enhance its impact.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Yes Accuretely reflected content of the manuscript	
Are subsections and structure of the manuscript appropriate?	Yes, there is a logical and well-organised structure with subsections.	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	This work has a strong scientific foundation, with a well-defined approach and statistical confirmation of the findings. There are suitable controls and repetitions in the well-designed experiment. The findings' technical validity is supported by how well they match the data that was provided.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	The references are sufficient, but recent studies on the production of okra and the function of gibberellic acid in crop growth would be essential.	
Minor REVISION comments		
Is the language/English quality of the article suitable for scholarly communications?	Although the language is largely understandable, some minor grammar adjustments can be necessary to improve academic writing.	
Optional/General comments	No additional Comments	

Review Form 3

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
