

**Review Form 3**

Journal Name:	<b>Journal of Education, Society and Behavioural Science</b>
Manuscript Number:	<b>Ms_JESBS_121365</b>
Title of the Manuscript:	<b>Investigating the Impacts of Flipped Classroom Approach on Class Nine Students Learning of Physics Concepts</b>
Type of the Article	<b>Original Research Article</b>

**Review Form 3**

**PART 1: Review Comments**

<b>Compulsory</b> REVISION comments	Reviewer's comment	<b>Author's Feedback</b> (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	This article has great significance because it sheds light on the effectiveness of the flipped classroom approach in enhancing physics learning among Grade 9 students. By investigating the impacts of this innovative teaching method, the research contributes to the growing body of knowledge on how to optimize student learning outcomes in science education. The findings of this study can inform educators, policymakers, and curriculum developers in making evidence-based decisions about instructional strategies that promote deeper understanding and engagement in physics. Ultimately, this research aims to improve the quality of physics education and prepare students for success in STEM fields.	
Is the title of the article suitable? (If not please suggest an alternative title)	<b>Suitable Titles</b> 1: Flipped Classroom and Physics Learning: A Study of Grade 9 Students 2: Investigating the Effectiveness of Flipped Classroom Instruction on Grade 9 Students' Physics Concept Mastery	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	If one type of research design is suggested then obviously abstract would be changed accordingly.	
Are subsections and structure of the manuscript appropriate?	Other sections and sub-sections are appropriate.	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	The study is beneficial but I will suggest that don't apply mixed method research design. Flipped classroom teaching can be very well assessed by Experimental research method. If researcher applied Mixed method in his/her thesis, then articles can be divided accordingly. As in one article three types of research designs are not justifiable in a robust way and especially the qualitative method whereas in abstract it was discussed about thematic analysis but in results and findings themes are not highlighted. Therefore, it is suggested to apply one design and the experimental design is best as most of the data in your findings is based on experimental and control group.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Follow the journal stranded References formatting style. There is no uniformity in references' formatting.	
<u>Minor</u> REVISION comments  Is the language/English quality of the article suitable for scholarly communications?	Language is fine.	
<u>Optional/General</u> comments	Research gaps were not highlighted. Statement of the problem can make the article sounder. Formulate the Research Questions and Hypothesis Specifically Experimental Research.	

**Review Form 3**

**PART 2:**

	<b>Reviewer's comment</b>	<b>Author's comment</b> <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<b>Are there ethical issues in this manuscript?</b>	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
