EDITORIAL COMMENT'S on revised paper (if any)	Authors' response to editor's comments
<p>1. There are deficiencies that were not made, references are missing, they should be added according to the suggestions, It is not clear how the oil was extracted. It should be explained whether any solvents are used. Palm oil is refined at high temperatures, how the oil was extracted at 30 degrees should be explained. Large quantities are not produced by soaking in water, pure product is obtained, but only in very small amounts. If analyzes were carried out on oils obtained in this way, this should be emphasized. It cannot be said that it is good by working on the oil obtained in very small amounts, because this is not the real production method.</p>	<p>The extraction process has been added. The references have been attached to the statements. The amount of oil used in the analysis is according to 11a, 11b, 12,13, and 14. The coconut oil was soaked in ether in analysis.</p>
