**PART 1: Review Comments**

<b>Compulsory</b> REVISION comments	<b>Reviewer's comment</b>	<b>Author's Feedback</b> (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	The research holds significant importance because it sheds light on the socio-economic, institutional, and environmental barriers that hinder farmers from adopting adaptive measures. By identifying these constraints, policymakers, agricultural experts, and development agencies can formulate targeted interventions to strengthen the resilience of smallholder farmers. However, in the introduction section, the Research Problem and Research question should be justified clearly, that why the researcher opted for this particular topic. Sentence should end with "So this study aims to identify different constraints....."	
Is the title of the article suitable? (If not please suggest an alternative title)	Constraints Perceived by Farmers towards Climate Change Adaptability in Bundelkhand Region (as adaptability is mentioned in table 1)	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The aim should be clear. What constraints the researcher is studying Keywords should be in alphabetical order Rest OK...	
Are subsections and structure of the manuscript appropriate?	Yes, However the discussion part is missing. There should be appropriate discussion based on the results.	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	The study is profound with the on-going climate issues. However, the justification of the study area is not up to the mark. The reason for selection of the study area should be justified with current data which is missing. Refer to various recent studies and Sources like IMD etc.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Yes, but latest references are missing. Most of the references are in between 2011-2014.	
<b>Minor</b> REVISION comments		
Is the language/English quality of the article suitable for scholarly communications?	Yes	
<b>Optional/General</b> comments	Recent studies should be cited, along with above mentioned reviews
