Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	The temporary pacing is the most important par in case of cardiac problems. This article aims to evaluate the safety, effectiveness and feasibility of insertion of a temporary pacemaker without guidance by cardiology fellows. The article also explains the importance of internal jugular, subclavian, femoral, or brachial veins usually can be used for insertion. The article demonstrates that cardiology fellows can perform this procedure without image guidance with great success and a low complication rate.	
Is the title of the article suitable? (If not please suggest an alternative title)	The title may be modified as "Study on unguided temporary pacing via the jugular vein: safety, effectiveness and practicability"	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Some statistical data can be added regarding " there are often not enough cardiologists or access to catheterization laboratories or echocardiography"	
Are subsections and structure of the manuscript appropriate?	Literature Review is missing in the article. Also the methods to be described in detailed manner. Conclusion may be modified by mentioning the success rate of the Case Study	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	The article "Study on unguided temporary pacing via the jugular vein at the Mohamed VI University Hospital of Marrakech: safety, effectiveness and practicability" appears to be good in view of temporary pacing required for patients in some critical conditions. The case study has shown remarkable success rate of 99.71% . This may be considered in primary and secondary healthcare settings but under the observations of experienced Cardiologists	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	References appears to be sufficient	
<u>Minor</u> REVISION comments Is the language/English quality of the article suitable for scholarly communications?	Quality of language to be improved	
<u>Optional/General</u> comments		

Review Form 3

PART 2:

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
