PART 1: Review Comments

<u>Compulsory</u> REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	The manuscript focuses on how educators as role models to learners, influence learning partly through the hidden curriculum. Educators are also influenced by diverse factors of their backgrounds of which some of these factors (gender, cultural and pedagogical diversity) are the subject of investigation of this study. Findings of the study are important in assisting educators to gain insights on how they can teach effectively in the context of these factors which influence their roles. The study also helps educators to reflect on factors (gender, cultural and pedagogical diversity) which may unconsciously influence how they facilitate learner performance through the hidden curriculum.	
Is the title of the article suitable? (If not please suggest an alternative title)	Title is suitable	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract is good. It has the background, problem/ purpose, methodology, findings and recommendations	
Are subsections and structure of the manuscript appropriate?	I suggest for removal of subheadings for theories and simply include the theories under a single subheading -- THEORETICAL FRAMEWORK	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	The manuscript focuses on topical issues in the 21 st century, which educators should be aware of and include in assisting learners to learn. Findings have been scientifically analysed and interpreted. Recommendations are based on findings.
