Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	Pruning generally is the common knowledge in plant physiology field study. However, the author can bring some new idea about comparing pruning in fruit, vegetable, and flower plants. This information can be very useful for the researcher to develop new approach of pruning method in particular plants. Also, this information can be useful for the farmers.	
Is the title of the article suitable? (If not please suggest an alternative title)	The title is suitable for the manuscript	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract is very comprehensive. It describes very well about the whole idea in the manuscript.	
Are subsections and structure of the manuscript appropriate?	Generally, the subsection is arranged systematically. However, the author should pay attention in the subsection entitle "introduction" in page number 11. It is not normal if the introduction is not in the beginning of the manuscript.	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	Generally, the information in the manuscript is useful. The author also put a lot of reference to support each idea in the manuscript which is make it scientifically robust. Some more detail about figure description in the manuscript should be conducted to make it more informative.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	The number of references that is used in the manuscript was sufficient. However, most of the references was published more than 20 years ago. It is still fine considering that pruning is basic knowledge in plant physiology. Please check the sequence of reference that is used in the manuscript.	
<u>Minor</u> REVISION comments Is the language/English quality of the article suitable for scholarly communications?	The English quality in the manuscript is suitable for scholarly communication. For the suggestion, please avoid the using of personal pronoun.	
<u>Optional/General</u> comments	The manuscript is informative and easy to be understand.
