

**Editor's Comment:**

Based on the recommendation of both the reviewers, the manuscript may be accepted for publication in BJI.

I have gone thru the revised manuscript peripherally and found some anomalies. For example, the opening sentence in the abstract which is as follows:

Amidases, also known as amidohydrolases (EC 3.5.1.4), are enzymes within the nitrilase superfamily or amidase signature family.

and the opening sentence in the Introduction which is as follows:

Amidases, classified as amidohydrolases (EC 3.5.1.4), belong to either the nitrilase superfamily or the amidase signature family.
