### PART 1: Review Comments

<b>Compulsory</b> REVISION comments	<b>Reviewer's comment</b>	<b>Author's Feedback</b> (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.</b>	The study is significant in that it identifies the influence of certain societal variables on farmers' willingness to adopt climate resilience agriculture. Identifying characteristics that influence farmers' attitudes about climate-resilient technology helps researchers understand the barriers to adoption, informing ways to overcome them and interventions that promote the adoption of climate-resilient agricultural technologies. Telangana's regional position in India is vulnerable to climate change; the new context is that these resilience agriculture technologies are currently mitigating the effects of climate variability across the world, including Telangana and India. This study contributes to the current body of knowledge on climate-resilient agriculture by offering additional insights and views from a specific geographical context.	
<b>Is the title of the article suitable? (If not please suggest an alternative title)</b>	<b>There is need to add assessment to the title, it will read: Assessment of Factors Affecting Farmer's Attitude Towards Climate Resilience Agricultural Technology in Telangana, India.</b>	
<b>Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.</b>	<b>No, the abstract should have included among others, the value of the R-square value, it Should capture part of the conclusion and policy implications of the research.</b>	
<b>Are subsections and structure of the manuscript appropriate?</b>	<b>No, there should be a theoretical literature review, methodology which should capture the map of the study area. The sample size (200) is small does not represent the target population of Telangana state, India.</b>	
<b>Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.</b>	The title clearly states the research question, indicating a focused study. Climate resilience in agriculture is a pressing global issue, making this study apt and timely. The manuscript incorporates concepts from agricultural economics, sociology, and environmental science, indicating an interdisciplinary approach.	
<b>Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.</b> :	<b>The reference aren't sufficient enough and some of them live more than a decade. In introduction phase there's need to use reference publish not more than a decade. For example there is need to provide an updated statistics of the census of source of livelihood of farmers not that of 2011 by agricultural census of India in 2011. Also Parry et al. 2007, Kotei et al., 2007 and (Saarinen, 1976 should also be updated.</b>
