

Editor's Comment:

Based on the reviewers' comments and authors' responses, I recommend the for publication.

However, the following corrections have to be made.

1. The title should be changed to "The Impact of Social Media Addiction on Academic Achievement of Distance Education Students at the University of Cape Coast."

2. Data Analysis: Mean and standard deviation are not adequate statistical analyses for measuring impact. The authors should conduct a Simple linear regression (SLR) analysis. Based on Fig 1 (page 11 of the paper) "conceptual model of the study" there are dependent and independent variables, as such, SLR analysis is necessary.
