

Editor's Comment:

This _ EJNFS/116054 Article has been modified according to the reviewer comments and meet the requirement of research paper. But I suggest "reject" this article.

The reasons are as follows:

1. References must be included in the text. There are too few references within five years.
2. The content of the text is not sufficient to support the narrative of the abstract. The text is only 2 pages, which is about twice to triple as long as the conclusion.
3. The conclusion is too long to clearly describe and correspond to the purpose of this article.
